

INFANT FORMULA, SOY, POWDERED

Date: April 2009

Code: B419

PRODUCT DESCRIPTION

- Powdered soy infant formula has added iron. The soy-based formula may be used for infants who cannot digest or are allergic to cow's milk and are not breast-fed.

PACK/YIELD

- Powdered infant soy formula is packed in about 14 ounce containers. One container, when mixed with water as directed on the package, makes about 104 fluid ounces of formula.

STORAGE

- Store unopened soy formula in a cool, clean, dry place.
- Cover opened cans of soy formula with the plastic lid and store at room temperature. Discard any remaining dry, unused formula after 30 days.
- Look at the "Best if used by" or "Best by" date on the package. Infant formula should not be consumed beyond the "use by date."
- For further guidance on how to store and maintain USDA Foods, please visit the FDD Web site at:
<http://www.fns.usda.gov/fdd/facts/biubguidance.htm>.

PREPARATION/COOKING

- Wash hands before preparing formula.
- Use 1 packed scoop for every 2 ounces of warm water.
- Once prepared, soy formula can be kept covered in the refrigerator for 24 to 48 hours (always check the label for exact instructions).
- Discard any leftover soy formula within one hour after feeding.

USES AND TIPS:

- Always follow exact mixing instructions on the package.
- Use a standard measuring cup instead of bottle markings to measure water. Too little water will make the formula hard to digest. Too much water will dilute the formula, which means your baby will not get the right amount of calories.
- Do not microwave. This may cause uneven heating and possibly burn your baby.

- Formula should not be frozen before or after mixing.

NUTRITION INFORMATION

- Powdered infant soy formula meets all nutritional needs for infants under 1 year of age.
- Powdered infant soy formula contains no lactose.

FOOD SAFETY INFORMATION

- Ask your pediatrician if you need to boil the water in your area before mixing a bottle, or about using bottled water.
